EKISTICS

REVIEWS ON THE PROBLEMS AND SCIENCE OF HUMAN SETTLEMENTS

VOLUME 20 - NUMBERS 116 - 121
JULY TO DECEMBER 1965

In this index the usual system of listing authors and countries has been followed, but—for the first time—an attempt has been made to relate the subject heads (in capitals) to the subdivisions of the Ekistic Grid, *reproduced on the opposite page.*

Subdivisions of the Ekistic Units *and the* Ekistic Cycle *have been grouped under these main heads (and cross-referenced): the breakdowns of* Basic Classification *and* Period *have been recorded under the main head of* Settlements. *The sub-heads of the five* Ekistic Elements (Nature, Man, Society, Networks, Shell) *have been grouped under each of these five heads (and cross-referenced). Sub-heads of* Academic Approach *have been kept together under this general head, except in cases where there was too great overlapping with sub-heads of the* Ekistic Elements.

It is hoped that this classification will enable the reader not only to find the articles he is interested in, but at once to see them in an ekistic context.
